Product Introduction:

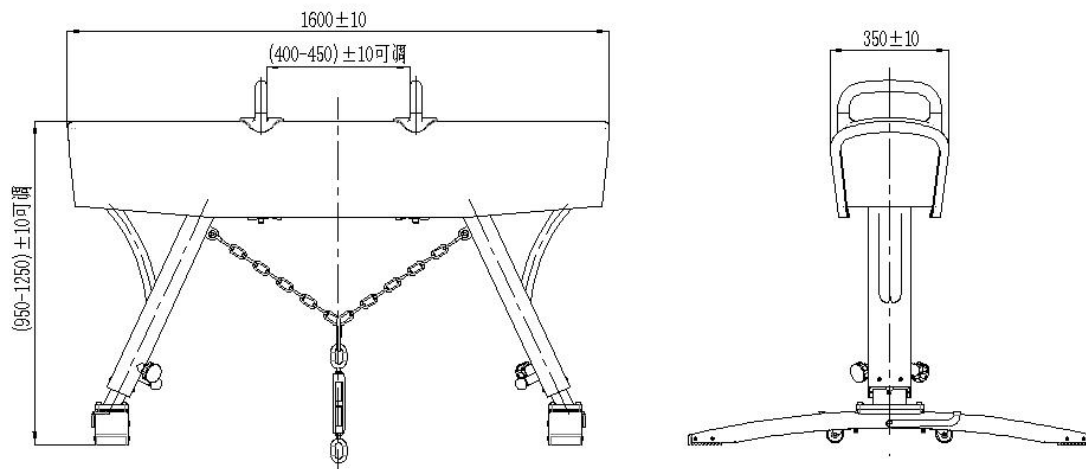

This product can be used in gymnastics pommel horse competition and training. The inner adjustment tube is set with multiple heights, which can be adjusted quickly and is convenient to install; the locking parts are firmly clamped and the installation is convenient; the gear parts can fully realize the needs of the pommel horse's height adjustment; the pommel horse has excellent shock absorption effect; this product can meet the competition and training needs.

Product description

1. The overall length of the pommel horse is 160cm;
2. The distance between the pommel horse rings is continuously adjustable from 40-45cm, and the overall height of the pommel horse is adjustable between 95cm-125cm.

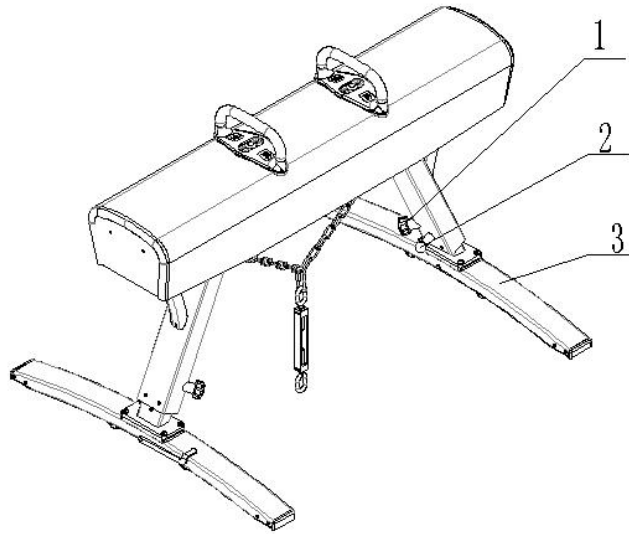

A: Pommel body B:Leg C:Chain

**Instructions for use:**

This product is specially designed for pommel horse competition and training.

Note: This product is shipped in a whole and has been assembled before shipment;

Adjustment instructions: Place the equipment on a flat ground and you can use it. First, loosen the locking part (1), pull the gear part (2), and then lift the inner adjusting tube (3) to achieve the height adjustment (Adjustment range 95cm-125cm). After reaching the specified height, tighten the locking part (1). At this time, connect the D-shaped shackle on the chain component to the embedded fixed part, and rotate the rigging screw buckle to adjust the preload. Ensure that the pommel horse body parts are highly balanced and coordinated.

**Maintenance:**

- 1) During the use of the pommel horse, check whether all the connecting parts of the product are loose or falling off regularly, and fasten or replace them in time to ensure safety.
- 2) When the surface of the equipment is stained, use a clean wet towel to gently wipe the surface.
